4100

Preservation of the (1) compressor, (2) upturned compressor and (3) UC nonblocking properties of a switch

Recursive 2X constructions from arbitrary building blocks

Recursive 2X constructions from cells

Banyan-type networks with monotonically decreasing trace and guide

4110

Preservation of the (4) decompressor,

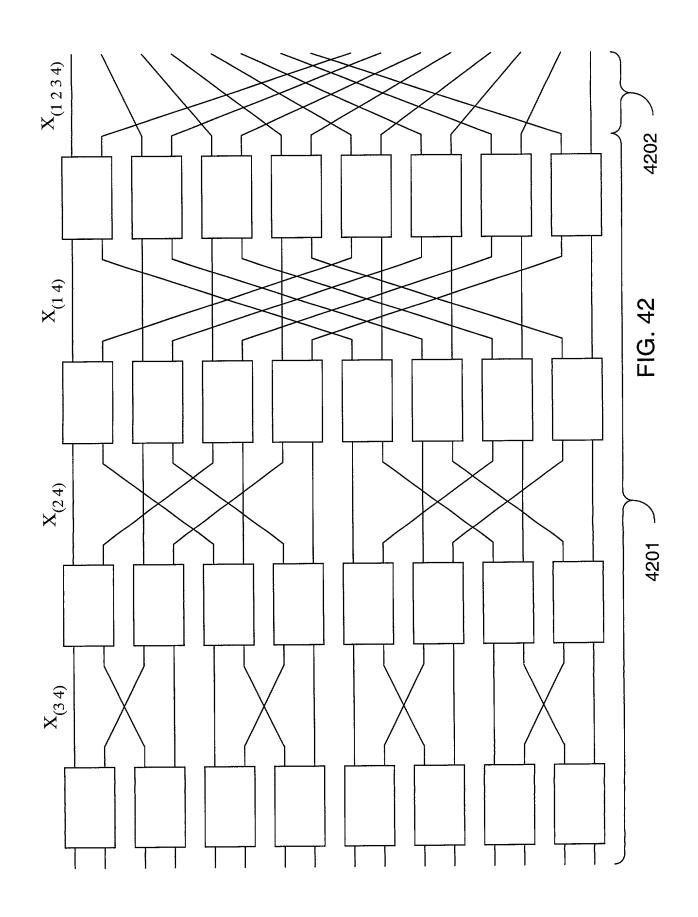

- (5) upturned decompressor,
 - (6) CU nonblocking,(7) expander,
- (8) upturned expander and
 - (9) circular expander properties of a switch

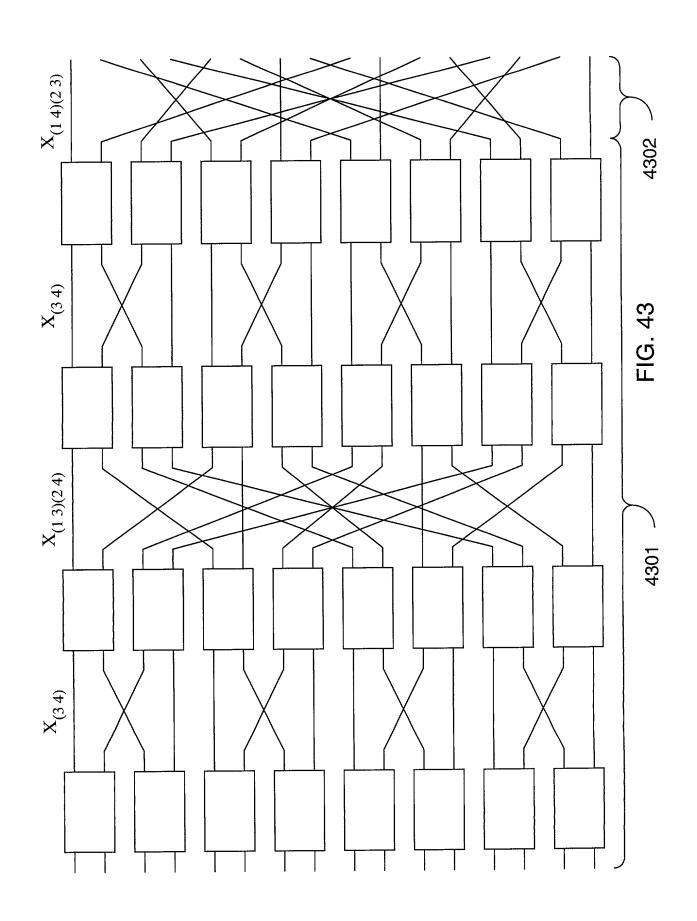

Recursive X2 constructions from arbitrary building blocks

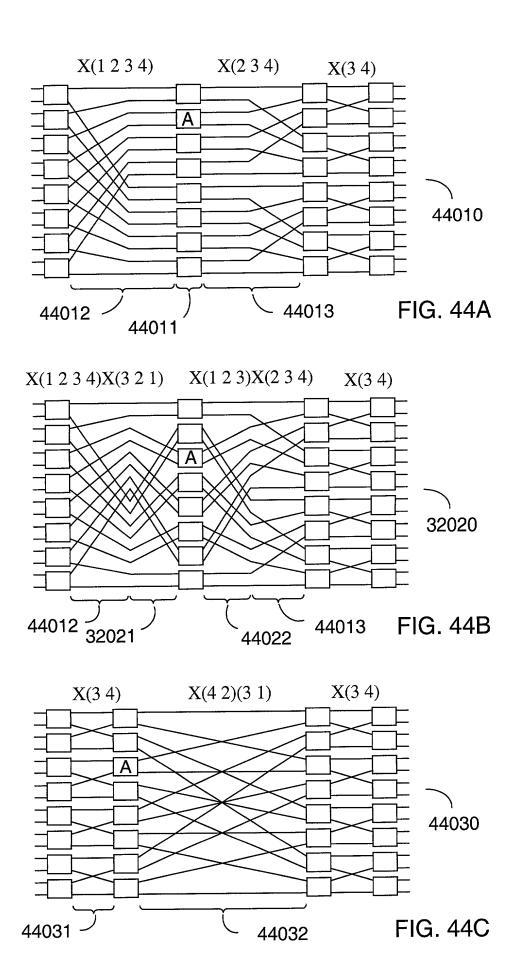

Recursive X2 constructions from cells

Banyan-type networks with monotonically increasing trace and guide

FIG. 41

Equivalence requiring the

4500

match of I/O exchanges

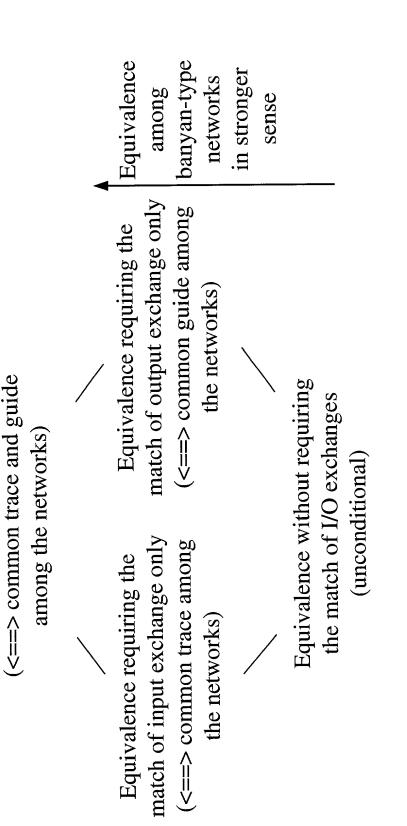

FIG. 45

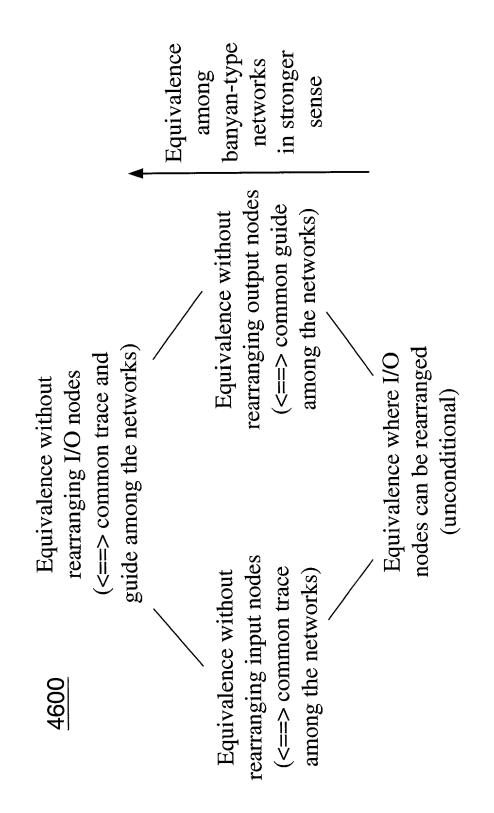

FIG. 46

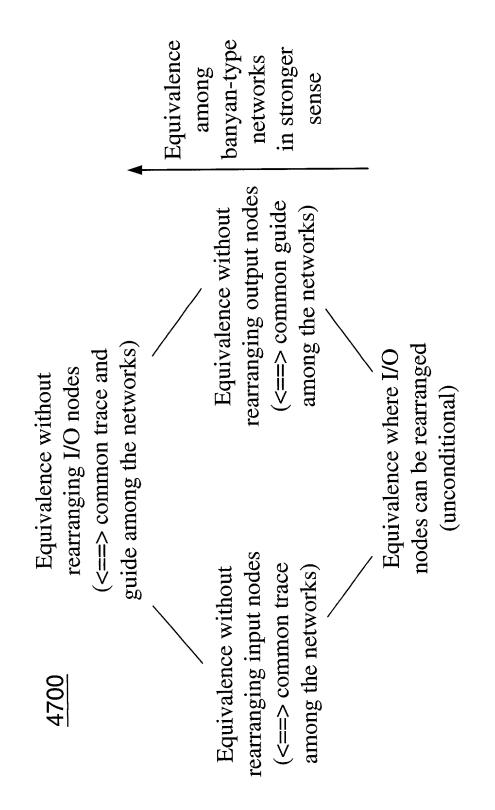

FIG. 47

Equivalence among bitin stronger permuting rearranging output nodes (<==> common guide among the networks) Equivalence without Equivalence where I/O nodes can be guide among the networks) (<==> common trace and rearranging I/O nodes Equivalence without rearranged rearranging input nodes (<==> common trace among the networks) Equivalence without

networks

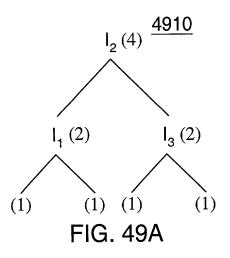

sense

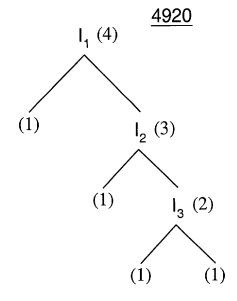

FIG. 48

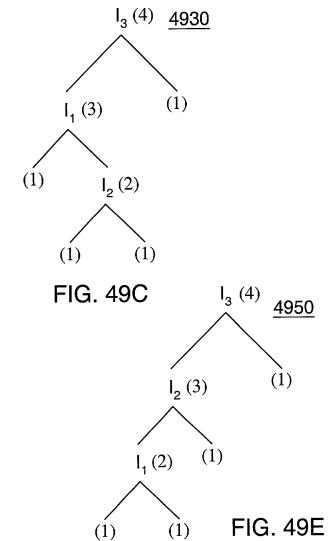

(<==> trace and guide of one network can be

repsectively changed to that of the other

network by a permutation)
